## 1:1 APPOINTMENTS

Think of it like business speed dating for event and meeting professionals! Our innovative AI-powered system matches hosted buyers and suppliers for individual appointments based on their requests, as well as additional factors. Meeting and event professionals sit at designated tables with suppliers who are given 6 minutes to talk business and get to know one another. A chime signals the beginning and end of each appointment, when suppliers then have 1 minute to rotate to their next appointment.
